

## SOLVE - A - CRIME

BY A. C. GORDON

Just before ringing the doorbell, you pause. The bullet hole in the panel of the door is in direct line with your chest and reminds you that what happened to one man could very well happen to another. So you step to one side as you press the button.

"Who is it?" a high-pitched feminine voice calls out.

"A law officer," you reply.

The door opens upon a tall, thin, gray-haired woman who looks you over carefully before

Sealed bids will be received by the office of the State Highway Department, Montgomery, Alabama, until 10:00 o'clock A. M., November 30, 1956, and at that time publicly opened for construction the Bridges on the Enterprise Road from Victoria, southeast to Ala. No. 30. Length — 0.054 mile.

The entire project shall be completed in sixty (60) working days.

Proposal fee is \$3.00. Plans are available for \$2.20. No refunds will be made.

Certified check or bid bond for 5 percent (Maximum \$10,000) of bid made payable to the Alabama State Highway Department must accompany each bid as evidence of good faith.

The minimum wage paid to all skilled, intermediate, and unskilled labor employed on this contract shall be as set forth in Special Provisions.

The proposed work shall be performed in conformity with the rules and regulations for

Water and Light Board Wages Listed

In contrast to last year's audit of the Light and Water Board operations, the recently completed check made a detailed analysis of salaries paid out by the board. Before the current audit, wages were lumped drawing how much.

For the fiscal year ending Sept. 30, 1956, Dick Dorman as superintendent of the systems drew top money. His salary was \$5,952.50 for the 12-month period, or \$496 per month.

John Young and Mrs. Myrtle Sellers drew identical paychecks for their work. As linemen Mr. Young received \$3,975 a year and Mrs. Sellers, cashier, took home a like amount. It breaks down to about \$331 per month.

As assistant to the superintendent, L. P. Mullins was paid \$2,650 per year. Durrell Hudson, assistant linemen, received the same salary. Monthly it amounts to \$220.

For duty as secretary — treasurer, Mrs. T. D. Kendrick drew \$1,325 or \$110 per month.

Facing Facts on the Farm Problem

Recently C. M. White, chairman of Republic Steel Corporation, gave a talk before the Farm Equipment Institute. He reflected some common sense views on the farm problem that are seldom heard in the rural areas so we are reprinting excerpts from his talk.

In the face of record prosperity in virtually every other phase of the economy, why has the income of farmers lagged behind?

"Farming is a business and sound economics should apply to farming as well as manufacturing and steel making. In farming, as in other businesses, the man who moves with the times stands a good chance of making money.

"This same principle applies to mechanization: to the proper use of seeds, fertilizers, insecticides; to the choice of crops to meet the needs of the market, and the other variables over which the farmer has control.

"But even the efficient farmer has had serious problems these past few years, and it is the cause of these problems that raises my dander. His grief goes straight back to the era of the Big Dealers in Washington when the Democrats started fiddling around with one law they should have handled with care: the law of supply and demand.

"Let me make one thing clear. I am in favor of the Soil Bank with its goal of reducing acreage under cultivation and building up our soil resources. I am in favor of the administration's flexible price support program. We need program like this to level out price fluctuations, encourage the growth of crops in short supply and discourage the growth of surplus crops. I am in favor of lowering supports gradually

in accordance with Section 12 of Act No. 492 of 1947. Legislation of the day of opening of bids is reserved.

The right to reject any or all bids is reserved.

### Hospital for Elba Should Get Serious Study

Now that the city council has appointed a board to go into the proposition of a new hospital for Elba, it is a good time to review the commitment the city would have to make to qualify for aid under the Hill-Burton Act.

Clay Dean, chairman of the state hospital planning board, at a meeting held in Elba last week also has to be considered.

1. Appoint a hospital authority responsible for planning, building and operating the hospital. (This the city council did last Monday.)

2. Determine how the city's share (one-third) of the estimated \$400,000 cost of a 20-bed hospital would be raised.

3. Secure a site and have a method to finance the deficit of \$5,000 for the first year of operations and \$6,000 the second. (This is in addition to the \$100,000 required. Financing a deficit operation for more than two years also has to be considered.)

There are good arguments for and against building a hospital in Elba. To stimulate discussion of the project we are going to list both the pros and cons.

Persons backing the idea of a 20-bed hospital here base their support of the project on these needs:

1. It would provide improved medical care for persons in and around Elba. Emergency cases would not have to be taken to Opp, Enterprise or Troy for treatment. In some instances the saving of time could mean the saving of a life.

2. More doctors could be attracted to the town because of the better facilities available to them. Young doctors are not being trained as fast as the population is growing and consequently are reluctant to establish a practice where modern hospitals aren't available. A young doctor can set up and make a good living for himself almost anywhere. He doesn't like to handicap himself with inadequate facilities.

3. One of the first questions asked by industry seeking to locate in a town is about hospital facilities. A hospital would increase

the town's desirability as an industrial site.

4. Hospitals in surrounding towns are always full of Elba patients. It would be much more convenient for the patients and their families if they didn't have to get in their cars and drive 16 to 30 miles to a hospital.

Arguments against having a hospital in Elba are:

1. It is too expensive for a small town. The \$100,000 spent on a hospital would put a strain on city finances and force encroaching other parts of a well-rounded program of municipal development. For example if extra money is raised to build and maintain a hospital, it would make it that much more difficult to raise the additional funds needed by the fire department to put on two full time firemen.

2. Raising over \$100,000 will require a new tax of some kind and no one wants another tax.

3. Folks in West Coffee County are as close to adequate hospital facilities as many city residents. It doesn't take as long to cover the 18 miles to Opp or Enterprise as it does for a resident on one side of Birmingham or Montgomery to cross the city through heavy traffic to a hospital located on the opposite side of the city.

4. A hospital is rated by its surgeons. In this age of specialists a good many potential patients would still go out of town for hospitalization because medical men with a high degree of training go into practice in the large population centers.

5. The hospital will operate in the red for at least two years and probably more. Clay Dean told Elba listeners that of 18 hospitals checked by his office, nine were operating at a deficit.

Many other arguments on both sides probably can be thought up by residents favoring or opposing establishment of a hospital here. The Clipper hopes to stimulate discussion of the proposal and make folks realize all the arguments are not on one side.

### TWO GIRLS.

### A CHEVY

### AND A RECORD!

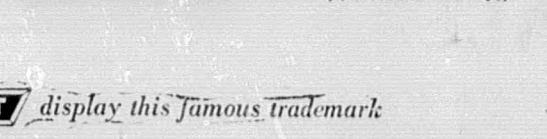

A meaningful achievement in automobile performance

Most automobile performance records are pretty difficult to relate to the kind of day-in, day-out driving most of us do. Running at safe and legal speeds, a '57 Chevrolet recently chalked up an important new coast-to-coast record on the road. And the way it set this record is even more important than the record itself!

A new '57 Chevrolet recently proved it has the qualities most people look for in a car—and proved it on the roads you travel. It set a new record (less than 57 hours for the run from New York to Los Angeles (certified by NASCAR). It was a strictly stock, V8-powered Chevy. It was driven by two young ladies.

When you consider that all the driving was done by 98-pound Betty Skelton and her friend Caroline Russ, the true significance of this record run becomes apparent. It's a tribute to Chevrolet's great-hearted V8 engine and solid road-worthiness that it could travel day and night for 2,913 miles at safe and legal speeds—and better the existing record for the trip by more than three hours.

And when a pair of young ladies step into a car and drive it round the clock to a new transcontinental record, you know that car is easy to drive. Cuz, try a Chevy.

Only franchised Chevrolet dealers display this famous trademark

## Better English

BY D. C. WILLIAMS

What is wrong with each of these sentences?

1. It has been proven that this medicine is a preventative.
2. The price was nowhere near as high as I had expected.
3. He came in under the awning to escape from the rain.
4. It was good of you to have invited me to the party.
5. Answer me direct, and please try to be intelligent.
6. He was just going to join his father when you arrived.
7. What are the correct pronunciations of these words?
8. Psychiatric.
9. Premiere (a first performance).

## ANSWERS

1. Say, "It has been PROVED that this medicine is a PREVENTATIVE."

2. Say, "The price was NOT NEARLY SO high as I had expected."

3. Omit "in" and "from."

4. Say, "It was good of you to INVITE me to the party."

5. Say, "Answer me DIRECTLY, and please try to be intelligent."

6. Say, "He was just ABOUT to join his father."

7. Pronounce sie-ki-att-ri-ck, accent third syllable.

8. Pronounce seh-ki-att-ri-ck, accent second syllable.

9. Pronounce preh-myare, accent second syllable.

10. The final "i" is pronounced as "ee," preferred.

11. Accent first syllable, not the second.

12. Accent first syllable, not the second.

13. Cinnamon, coercion, parson, chief, supervise, devious.

Use 2, 4-D Amine

On Wild Onions

—Livestockmen can wage an effective campaign against one of their serious pasture foes — wild onions and garlic.

Extension Agronomist O. N. Andrews said this week that two pests could be effectively controlled by spraying 2,4-D amine anytime now during a warm spell of at least 24 hours duration.

These two weeds are the No. 1 headache for the dairyman — they suffer a heavy loss when their cattle produce milk tainted with onion flavor. They grow in pastures throughout the state, but plague North Alabama farmers more than others. They rear their ugly heads in permanent pastures, in winter grazing crops, and in mixtures of legumes and grasses or small grain.

For best results, Andrews recommended spraying one and one-half to two pounds of 2,4-D amine per acre. Add one-quarter pound of common household detergent to 30 gallons of the spray mixture. Coat the plants thoroughly with the spray.

He explained that the two-pound rate of 2,4-D will not harm established perennial pastures. But it may damage white clover and other legumes. Andrews warned that grasses and small grains should not be sprayed until six or seven inches high since the spray mixture seedlings of most plants. Do not spray in boot stage.

He added that MH40 at the rate of 10 pounds per acre has given excellent results in API

## From Our Early Files

The Sunbeam Band met Friday afternoon at the Baptist Church. In the absence of the president, Martha Frances Dowling presided. The secretary, Robert L. Whitman, announced the business and Jean Rhodes presided as Personal Service chairman and recorded personal service rendered during the past week. She was assisted by Carolyn Russ. Devotional was conducted by Jean Rhodes and the singing by Peggy Blue, Frances Dowling, Betty Clark, Margaret Whitman, Mamie Blackmon, Jeanette Lubert, Mary Oswald, Jeanette, John Burton and Fred Harper Jr.

Read solo by Jean Rhodes; vocal sextet, Frances Dowling, Margaret, Jeanette Lubert, Carolyn Russ, Jean Rhodes and Catherine Nollins. At the social hour Peggy Blue gave a reading. Visitors were Nina English, Linus Ross, General Dewberry, Hazel Brooks, Betty Ham and Anne Jernigan.

—22 Years Ago—

The Rev. C. B. West was returned to Elba as pastor of the Bethel A. M. E. church for another year by the conference that convened in Brundidge last week. According to report, he has made a good record during his year's pastorate here, and his return is pleasing to his membership.

—22 Years Ago—

Workers are widening the double doors on the west side of the Dorsey warehouse across the street from The Clipper office. Supposedly, Mr. Dorsey is having this done in order that his long trailers may back through without the trouble and delay they have been having. Widening the doors is a real kindness to members of The Clipper force, for we have watched truck drivers, time after time, spend many minutes trying to back through those narrow doors, until our nerves are almost in a frayed condition.

—22 Years Ago—

There is such a demand for Dorsey Trailers that the Dorsey factory cannot manufacture them fast enough to satisfy its customers, although a large crew of workmen is busy day and night. W. Kay Farris took some 45 orders during his recent week trip to Florida. His customers became so impatient that he loaded four trailers on a truck and left for Florida last Friday in an effort to pacify some of them until more of the popular trailers can be turned out.

The Dorsey Trailers are certainly putting Elba on the map. It is predicted that the Dorsey Trailers will be a big success.

Nov. 18 is the program stressed by the Dorsey Trailers.

During the week, classrooms were visited by parents and patrons of the school.

Several pupils from the 4th grade under the direction of Eloise Jackson took part in the chapel program Nov. 14. Guest speaker was R. L. Farris, Col. Farris County superintendent of Education who talked on the purpose and application of education. Music for the program was furnished by the New Brockton High School choir under the direction of Marie DuBoise and Adelle Edwards.

Nov. 18 is the program stressed by the Dorsey Trailers.

Experiment Station tests, but the present time this method is too expensive to be practical.

10 times more than the cost of 2,4-D.

Fingermarks and smudges on Venetian blind slats usually can be removed with an art eraser.

## Farm News and Reports

## 8 Percent Increase in Farm Land Prices

AUBURN — The price of Alabama farm lands climbed eight percent last year.

This rise was chalked up from July '55 to July '56. And API Extension Economist Roy Helms predicted this week that the cost of land will continue to rise.

Since farm income is down, land becomes the farmer's best investment. However, he is not the only one who believes it is a good investment. Thirty-five percent of the people who purchased rural land last year were not farmers. Many were merely seeking safe long-term investments for their money, others belonged to the growing class of suburban dwellers, and then some land was sold for industrial sites.

Many farmers, receiving lower prices for their products, bought land to enlarge their farms and gain a more economical operation possible in this year's pastorate here. Others now find they face a decision—whether to buy more land or to invest in equipment, buildings, and the like. Helms advised the farmers to hold on to their land, if at all practical, and to seriously consider the potential income of any land they are interested in buying.

The trend of rising land values in Alabama is reflected in land prices throughout the nation. This trend, according to Helms, shows the change found in people's attitude toward land

Soil samples to be tested for spring planting should be taken now, County Agent J. R. Speed recommended.

Samples sent to the soil test laboratory at API in Auburn will receive prompt service at this time of the year, he declared.

During the first three months of the year — January, February and March — more soil samples arrived at the Laboratory than at any other time of the year (see chart). For this reason, service is much slower during these months than at other seasons.

County Agent Speed advised that soil samplings of fields muddy feet — two main causes planned for spring crops should of dirty eggs.

Some pigs have 15 or 16 pairs of ribs instead of the usual 14.

When sampling is done early enough time is allowed before planting season to apply lime if necessary. He pointed out that limestone is slowly soluble and should be applied to the field several months before planting.

Soil cartons and shipping cartons are now available in the County Agent's office.

Keep hens confined to the laying house at all times after they are in production. This allows positive control over the uniformity of their eggs.

It also does away with wet feathers and muddy feet — two main causes of dirty eggs.

## SOIL CONSERVATION

JIMMIE HOLLAND Soil Conservationist

Fountain Lee, Lee community, is making good use of roced land on his farm. He has been planning these sites in pine trees. This practice is making his old farm picture take on a new look.

Now these eroded places on the farm look green. In a few years Mr. Lee will be harvesting corn from this once badly eroded land.

Mr. Lee is doing other soil and water conservation practices on his farm. This spring the Soil Conservation Service assisted him in laying out drainage races and planning complete water disposal systems. He is planting bahia grass on land that is subject to severe erosion. This fits into his livestock program.

Bahia grass can be planted with success in several ways. Recently Taylor Redmon of the Perry Store community planted Bahja grass on oats. The oats were sown and disked in. The

grass seed was sown with a seeder and left on top of the ground.

This is an excellent way of seeding bahja grass in the fall. Many farmers report satisfactory stands by using this method of planting.

When sampling is done early enough time is allowed before planting season to apply lime if necessary. He pointed out that limestone is slowly soluble and should be applied to the field several months before planting.

Soil cartons and shipping cartons are now available in the County Agent's office.

Keep hens confined to the laying house at all times after they are in production. This allows positive control over the uniformity of their eggs.

It also does away with wet feathers and muddy feet — two main causes of dirty eggs.

Some pigs have 15 or 16 pairs of ribs instead of the usual 14.

## J. A. Coker Seriously Injured in Accident

J. A. Coker of New Brockton was critically injured Monday and in in Enterprise Hospital, County Assessor Bill Wise reported Wednesday morning. Mr. Wise said that Mr. Coker was working underneath his truck which was jacked up. The pack slipped, causing the truck to fall on Mr. Coker in such a way that his was crushed, especially about the head. It was thought when he first reached the hospital that he was dead but he was revived and was still alive Wednesday morning but in a critical condition.

Mr. Coker is about 30 years old and is well known in this section, especially among farmers. He has spread vast quantities of lime and other fertilizers for farmers throughout the county.

Legal In the matter of the estate of John H. Brown, Deceased. In the Circuit Court of Coffee County, Alabama, in equity, Elba Division.

In pursuance and in accordance with the terms and direction of an order, issued and addressed to the undersigned by the Honorable Eris F. Paul, Judge of the Circuit Court of Coffee County, Alabama, bearing date of 28th day of November, 1956, I will proceed to sell to the highest bidder, for cash at public auction, in front of the Courthouse door of said County, Elba Division, on Saturday, the 22nd day of December, 1956, between the legal hours of sale, all that certain real estate property, which is described as follows:

All that part of the following described land which lies South of Highway U. S. 84 in Coffee County, Alabama, namely: That part of NW 1-4 of NE 1-4, Section 18, Township 5, Range 20, lying West of Drain Ditch, containing 20 acres, more or less.

SW 1-4 of Section 7, Township 5, Range 20, Except ten acres, more or less, lying in the Northeast corner of said forty and being bounded at the present time on East and South side by a wire fence which begins at the North side of said forty and runs south to a branch and thence west along said branch to land of Mrs. M. M. Pearce, the land above described being conveyed hereby containing 30 acres, more or less.

The SW 1-4 of NW 1-4 less one and one-half acres on the North side, sold to J. V. Mays. The E 1-2 of SW 1-4 all being in Section 7, Township 5, Range 20, containing 118 1-2 acres, more or less.

The above lands are subject to easement granted to South-east Alabama Gas District by deed recorded in the Probate Records of Elba in Deed Book 21-A, at page 482. Less and except the following described parcels numbered (1) to (5) inclusive.

(1) That certain one-half acre of land in SE 1-4 of SW 1-4 Section 7, Township 5, Range 20, deeded to Curtis Booker and Agnes Booker by deed recorded in the Probate Records at Elba in Deed Book 19-A, at page 58, as corrected by deed recorded in Deed Book 22-A, at page 109.

J. A. COKER

Gov. & Mrs. James E. Folsom announce the birth of a 9 lb. 11 oz. son at 6:20 o'clock Tuesday night in Montgomery. He has been named Joshua Melvin.

## CLASSIFIED
